## ABSTRACT

In colleges, students often misplace their belongings, and finding them can be difficult without a proper system. To solve this problem, our team developed a **Lost and Found College Hub**, an application that helps students report and search for lost items easily. The system allows users to post details about items they have lost or found, making it simple to connect owners with finders. The application is built using **Java Swings** for the frontend and **MySQL** for the database to store and manage item details efficiently. This project aims to create a convenient, organized, and user-friendly platform that helps students recover their lost items and promotes better communication within the campus.

## ACKNOWLEDGEMENT

We express our sincere thanks to our beloved and honorable chairman **MR. S. MEGANATHAN** and the chairperson **DR. M.THANGAM MEGANATHAN** for their timely support and encouragement.

We are greatly indebted to our respected and honorable principal **Dr. S.N. MURUGESAN** for his able support and guidance.

No words of gratitude will suffice for the unquestioning support extended to us by our Head Of The Department **Dr. E.M. MALATHY** and our Deputy Head Of The Department **Dr. J. MANORANJINI** for being ever supporting force during our project work

We also extend our sincere and hearty thanks to our internal guide **Dr. V. JANANEE** , for her valuable guidance and motivation during the completion of this project.

Our sincere thanks to our family members, friends and other staff members of computer science engineering.

**1. SANSIA.J**

**2. SHANTHOSH SIVAN.E**

# **CHAPTER 1**

## **INTRODUCTION**

### **1.1. INTRODUCTION**

This project helps students report and find lost items within the college campus. It provides a simple way to post details of lost or found belongings and allows users to search for items based on their description. The system maintains a record of all items and helps connect owners with finders quickly and easily.

### **1.2. SCOPE OF THE WORK**

The Lost and Found College Hub helps students locate lost belongings and report found items. It improves communication within the campus and ensures items are returned to their rightful owners in an organized manner.

### **1.3. PROBLEM STATEMENT**

Many students lose items on campus and face difficulty finding them due to the absence of a proper system. This project solves that problem by creating a digital platform where students can record and retrieve lost and found information easily.

### **1.4. AIM AND OBJECTIVES OF THE PROJECT**

The main objective of this project is to help students report and recover lost items efficiently. The system keeps track of lost and found items in a database and allows quick search and updates. It provides a user-friendly interface for easy access and promotes better organization in the college.

## **CHAPTER 2**

### **SYSTEM SPECIFICATIONS**

#### **2.1. HARDWARE SPECIFICATIONS**

Processor : Intel i5

Memory Size : 8 GB (Minimum)

HDD : 500 GB (Minimum)

#### **2.2. SOFTWARE SPECIFICATIONS**

Operating System : Windows 11

Front-End : Java Swings

Back-End : MySQL

Language : Java, SQL

## **CHAPTER 3**

### **MODULE DESCRIPTION**

This application consists of two modules. When the program runs, it will ask for a confirmation to the login window. The person who interacts can login as an Administrator or as a User. The description of the modules are as follows:

#### **1. Admin Login:**

The administrator can view, verify, and manage lost and found reports. They can update or delete entries and maintain the database.

#### **2. User Login:**

Students can report lost or found items by entering item details. They can also search for items and contact the admin if a match is found.

## CHAPTER 4

### SAMPLE CODING

#### Sample 1 – Adding Lost Item Details to Database

**This code allows a user to enter lost item details and save them into the database.**

```
import javax.swing.*;

import java.awt.event.*;

import java.sql.*;

public class AddLostItem {

    public static void main(String[] args) {

        JFrame f = new JFrame("Report Lost Item");

        JLabel l1 = new JLabel("Item Name:");

        l1.setBounds(30, 30, 100, 30); JTextField t1 =

        new JTextField(); t1.setBounds(150, 30, 150,

        30);

        JLabel l2 = new JLabel("Location:");

        l2.setBounds(30, 80, 100, 30); JTextField t2 =

        new JTextField();
```

```
t2.setBounds(150, 80, 150, 30);
```

```
JLabel l3 = new JLabel("Description:");
```

```
l3.setBounds(30, 130, 100, 30); JTextField t3
```

```
= new JTextField(); t3.setBounds(150, 130,
```

```
150, 30);
```

```
JButton b = new JButton("Save");
```

```
b.setBounds(100, 200, 100, 30);
```

```
b.addActionListener(new ActionListener() { public void
```

```
    actionPerformed(ActionEvent e) {
```

```
        try {
```

```
            Connection con =
```

```
DriverManager.getConnection("jdbc:mysql://localhost:3306/lostfound", "root", "");
```

```
            PreparedStatement ps = con.prepareStatement("INSERT INTO items(name, location,
description) VALUES (?, ?, ?)");
```

```
            ps.setString(1,    t1.getText());
```

```
            ps.setString(2,    t2.getText());
```

```
            ps.setString(3,    t3.getText());
```

```
            ps.executeUpdate();
```

```
            JOptionPane.showMessageDialog(null, "Lost item added successfully!");
```

```
        } catch (Exception ex) { JOptionPane.showMessageDialog(null,
```

```
            ex.getMessage());
```

```
    }
```

```

    }

});

f.add(l1); f.add(t1);

f.add(l2); f.add(t2);

f.add(l3); f.add(t3);

f.add(b); f.setSize(400,
300); f.setLayout(null);

f.setVisible(true);
}
}

```

## Sample 2 – Searching for a Lost Item

**This code allows users to search the database for an item by name.**

```

public class SearchItem {

    public static void main(String[] args) {

        JFrame f = new JFrame("Search Lost Item");

        JLabel l1 = new JLabel("Enter Item Name:");

        l1.setBounds(30, 30, 150, 30);

        JTextField t1 = new JTextField();

        t1.setBounds(180, 30, 150, 30);
    }
}

```

```

JButton b = new JButton("Search");

b.setBounds(100, 80, 100, 30);

JTextArea result = new JTextArea();

result.setBounds(30, 130, 300, 150);

b.addActionListener(new ActionListener() { public void

    actionPerformed(ActionEvent e) {

        try {

            Connection con =
DriverManager.getConnection("jdbc:mysql://localhost:3306/lostfound", "root", "");

            PreparedStatement ps = con.prepareStatement("SELECT * FROM items WHERE name LIKE
?");

            ps.setString(1, "%" + t1.getText() + "%");

            ResultSet rs = ps.executeQuery();

            String data = ""; while

            (rs.next()) {

                data += "Item: " + rs.getString("name") + "\nLocation: " + rs.getString("location")
+

                "\nDescription: " + rs.getString("description") + "\n-----\n";

            }

            if (data.equals("")) data = "No items found!"; result.setText(data);

```

```
        } catch (Exception ex) { JOptionPane.showMessageDialog(null,  
            ex.getMessage());  
        }  
    }  
});  
  
f.add(l1); f.add(t1); f.add(b); f.add(result); f.setSize(400,  
350);  
  
f.setLayout(null);  
  
f.setVisible(true);  
}  
}
```

## CHAPTER 5

### SCREENSHOTS

FIG 5.1 LOGIN PAGE

The screenshot shows a web browser window titled "Lost and Found Hub - Login". The page has a dark blue background. At the top center, the text "Lost and Found Hub" is displayed in a light blue font. Below this, there are two input fields: "Email:" and "Password:". Each field has a light blue border and a small icon on the right side. Below the input fields, there are two buttons: "Login" and "Signup", both with a light blue background and dark blue text.

FIG 5.2 REPORT LOST ITEM PAGE

The screenshot shows a web browser window titled "Lost and Found Hub - User Dashboard". The page has a dark blue background. At the top, there is a navigation bar with four tabs: "Report Item", "My Reports", "Notifications", and "Settings". Below the navigation bar, the text "Report Lost or Found Item" is displayed in a light blue font. The form contains several input fields: "Item Type:" with a dropdown menu showing "Lost", "Title:", "Description:" (a larger text area), "Category:", "Location:", and "Image (Optional):" with a "Choose Image" button. At the bottom, there is a "Submit Report" button.

**FIG 5.3 REPORT FOUND ITEM PAGE**

The screenshot shows a web application window titled "Lost and Found Hub - User Dashboard". The navigation bar includes "Report Item", "My Reports", "Notifications", and "Settings". The main content area is titled "Report Lost or Found Item" in red. It contains a form with the following fields:

- Item Type:** A dropdown menu with "Found" selected.
- Title:** A text input field.
- Description:** A large text area.
- Category:** A text input field.
- Location:** A text input field.
- Image (Optional):** A text input field next to a "Choose Image" button.

At the bottom of the form is a red "Submit Report" button.

**FIG 5.4 REPORT PAGE**

The screenshot shows a web application window titled "Lost and Found Hub - User Dashboard". The navigation bar includes "Report Item", "My Reports", "Notifications", and "Settings". The main content area displays two items:

- mobile phone (Lost) - Matched
- MOBILE PHONE (Found) - Matched

At the bottom of the page is a red button labeled "View Details".

**FIG 5.5 ADMIN OVERVIEW PAGE**

FIG 5.6 ADMIN LOST AND FOUND MATCH PAGE

The screenshot shows the 'Matched Items' section of the 'Lost and Found Hub - Admin Dashboard'. The dashboard has a dark background and a navigation bar at the top with tabs: Overview, Unassigned Reports, Matched Items, Claimed Items, and Analytics. The 'Matched Items' tab is selected. The main content area displays a table with the following data:

| Item ID | Title        | Type  | Reporter | Admin | Matched Date          | Category |
|---------|--------------|-------|----------|-------|-----------------------|----------|
| 1       | mobile phone | Lost  | 2        | 1     | 2025-10-29 18:27:47.0 | N/A      |
| 2       | MOBILE PHONE | Found | 2        | 1     | 2025-10-29 18:28:58.0 | N/A      |

Below the table, there are two buttons: 'View Details' and 'Mark as Claimed'.

## **CHAPTER 6**

### **CONCLUSION AND FUTURE ENHANCEMENT**

This project helps students easily report and recover lost items within the college. It provides an organized platform to store and manage item details. In the future, image uploads and mobile app integration can be added to make the system more efficient and user-friendly.
